

## TEST REPORT N. 20/000264621

date of issue 14/07/2020

Customer ID	0072498	Messrs IYONCHEM KIMYA TEKNOLOJI. SAN. TIC. LTD. STI. VELIKOY MAH.HURRIYET 1.SOK NO:2 DAIRE:4A - CERKEZKOY/TEKIRDAG Turchia
-------------	---------	--

**Sample information**

Acceptance number	20.520635.0012	
Delivered by	The Courier on 03/07/2020	
Receiving Date	03/07/2020	
Place of origin	KALITE SISTEM MERKEZ LABORATUARLARI A.S. DEGIRMEN SOK. AR PLAZA B BLOK NO:16KOZYATAGI 34742 ISTANBUL Turchia	
Sample Description	NATURIST SIVI EL VE C LT DEZENFEKTANI (Protocol No: 1002020017915)	

**Sampling information**

Sampled by Customer

### ANALYTICAL RESULTS

	Value/ Uncertainty	Unit of measure	LoQ	LoD	Start/end date of analysis	Op. units	Line
<b>ON SAMPLE AS IT IS</b>							1
SKIN IRRITATION (HUMAN SKIN MODEL) <small>Met.: OECD 439:2019</small>	not irritating				13/07/2020- -13/07/2020	09	2

**Operative units**

Unit 09 : Via Fratta Resana PHARMA (TV)

The results contained in this Test Report refer only to the analyzed sample. The test report shall not be reproduced except in full, without written approval of Chelab laboratory.

- If not otherwise specified, the uncertainty is extended and has been calculated with a coverage factor  $k=2$  corresponding to a probability interval of about 95%. - LoD is the detection limit and identifies a confidence interval of zero with a probability interval of about 99%. - LoQ is the limit of quantification. "n.d" is not detected and indicates a value inferior to the LoD. "traces (X)" means a value between LoD and LoQ, this value is indicative. "<x" or ">x" indicate inferior or superior to the measurement field of the test. - If not differently specified, the sums are calculated by lower bound criteria (L.B.). - In case of alteration of the sample the laboratory declines any responsibility on the results that can be influenced by the deviation in case the customer asks for the execution of the test anyway. - If the sampling is not carried out by the laboratory staff, the results obtained are considered referring to the sample as received and the laboratory declines its responsibility for the results calculated considering the sampling data provided by the Customer. The name and contact information of the Customer are always provided by the Customer. - If not differently specified the quantitative microbiological tests (excluded MPN) are performed on single repetition and two consecutive dilutions in accordance to ISO 7218:2007/Amd1:2013. - If there is a specification (customer specifications, law limits) which has been compared to the analytical results, the values shown in bold indicate a result which is out of the specification. - If not differently specified the judgments of compliance /non-compliance eventually reported are referred to analysed parameters and are based on the comparison of the value with the reference values without considering the confidence interval of measure.

## In Vitro Skin Irritation: Reconstructed Human Epidermis Test Method OECD 439:2019

### SAMPLE INFORMATION

ID Sample: 20.520635.0012  
Sample description: NATURIST SIVI EL VE CİLT DEZENFEKTANI (Protocol No: 1002020017915)

### METHOD

In Vitro Skin Irritation: Reconstructed Human Epidermis Test Method OECD 439:2019

### TEST RESULTS

Table 1: Positive control and test sample

	Mean Viability (%)	SD (%)	Result
Negative control	100.00	2.72	Non irritant
Positive control	4.79	0.36	Irritant
Test Substance	90.42	2.19	Non Irritant

Table 2: Acceptability criteria

	Calculated value	Criteria	Result
Mean OD <sub>570</sub> of the blank	0.04	< 0.1	PASS
Mean OD <sub>570</sub> of negative control	1.60	1 ≤ x ≤ 2.8	PASS
Mean viability of positive control	4.79	≤ 20 %	PASS
Standard deviation of negative control	2.72	< 18 %	PASS
Standard deviation of positive control	0.36	< 18 %	PASS
Standard deviation of test substance	2.19	< 18 %	PASS

Acceptability criteria were satisfied.

VIABILITY TEST SAMPLE: 90.42 %

RESULT (viability > 50% = non irritant; viability ≤ 50% = irritant): **NON IRRITANT**
